

INTERNATIONAL UNION of FOOD SCIENCE AND TECHNOLOGY
Strengthening Global Food Science and Technology for Humanity

IUFOST partners with Fi Global to host cutting edge science program as part of Health and Nutrition Week

IUFOST's Mission: "Strengthening Global Food Science and Technology for Humanity"

September 2018 – The International Union of Food Science and Technology (IUFOST) will partner with Fi Global and Hi Europe to host a workshop to highlight the potential impact of new food technologies on consumer health. The event is being held in cooperation with the Association of German Food Technologists (GDL), Gesellschaft Deutscher Lebensmitteltechnologe n e.V. The workshop will be held in Frankfurt, Germany on Wednesday 28th November as part of "Health and Nutrition Week" <http://www.healthandnutritionweek.com> during the Hi Europe exhibition <https://www.figlobal.com/hieurope>

The focus of the program will be "Healthy Foods Through New Food Processing Technologies". Over the past half-century, considerable research has shown that poor diets contribute to several hundred thousand premature deaths annually. That research has served as the foundation of the Food Industries' mission: to be the vehicle for improving consumer health. New food technologies will be fundamental for achieving this aim. The session will be moderated by Professor Dr. Dietrich Knorr, Food Biotechnology & Food Process Engineering, Technical University Berlin and IUFOST President 2016 - 2018. Expert speakers and world-renowned scientists will address critical areas pertaining to the supply of nutritious, sustainable and safe food using emerging technologies. Senior management, business

strategists, research and development scientists and food professionals will all benefit by attending this event. For registration information, please visit <http://iufost.org/events/health-and-nutrition-week-workshop-healthy-foods-through-new-food-processing-technologies/>.

About IUFOST: The International Union of Food Science and Technology (IUFOST) is the global scientific organisation representing over 300,000 food scientists and technologists from more than 75 countries. IUFOST has five regional groupings, ALACCTA representing Central and South America, EFFoST representing Europe, FIFSTA representing the ASEAN countries, MENAFoST representing the Middle East and North Africa and WAAFoST representing West Africa. IUFOST is a full scientific member of ICSU (International Council for Science) and it represents food science and technology to international organisations such as WHO, FAO, UNDP and others. IUFOST organises world food congresses, among many other activities, to stimulate the ongoing exchange of knowledge in those scientific disciplines and technologies relating to the expansion, improvement, distribution and conservation of the world's food supply. It provides the international food science and technology community with its best opportunity to exchange ideas and develop strategies to meet IUFOST's goals. For more information: visit iufost.org; or contact: Professor Dr.- Ing. Dietrich Knorr dietrich.knorr@tu-berlin.de.

About Association of German Food Technologists (GDL) (Gesellschaft Deutscher Lebensmitteltechnologe n e.V.): The Gesellschaft Deutscher Lebensmitteltechnologe n e.V. (GDL) is the scientific and technological society of the German Food Technologists. The aims of the society are to represent and promote the interests of Food Science and Technology on the national and on the international level. The GDL operates on a non-profit basis. In order to obtain the mentioned aims the GDL supports educational measures in the field of Food Science and Technology on basic and advanced levels; promotes the co-operation with other organisations and societies in the field of Food Science and Technology; promotes the connection between food research institutions and the food industry and supports the professional interests of its members.

About Health and Nutrition Week, 24 -30 November 2018: Health and Nutrition Week will run alongside Hi Europe and Ni 2018, offering a top-level thought leadership programme, starting on November 24. Working together with external experts from the food industry, academia, market research and more, organizer UBM has created an inspiring line-up of topical presentations and workshops. Read more about the event: <http://www.healthandnutritionweek.com/>.

About Hi Europe and Ni: Hi Europe and Ni are the leading global events for health, natural nutrition and wellness ingredients, where international leaders in nutritional food and beverage innovation meet biennially to present their latest solutions and network. This event showcases ingredients and solutions for food and drink formulation, dietary supplements, nutraceutical, personal care products and more.

About UBM: Hi Europe and Ni are organised by UBM plc. UBM is the largest pure-play B2B events organiser in the world. 3,750+ people, based in more than 20 countries, serve more than 50 different sectors. Our deep knowledge and passion for these sectors allow us to create valuable experiences which enable our customers to succeed. Please visit www.ubm.com for the latest news and information about UBM.

About Food ingredients Global – the trusted route to market since 1986: Food ingredients Global was launched in Utrecht, The Netherlands, in 1986. Its portfolio of live events, extensive data, digital solutions and high-level conferences is now established throughout the world and provides regional and global platforms for all stakeholders in the food ingredients industry. Over 500,000 people have attended our shows over the years, with billions of Euros worth of business created as a result. With more than 30 years of excellence, our events, digital solutions and supporting products deliver a proven route to market for a truly global audience. For more information about the Food ingredients portfolio, please visit: www.figlobal.com.
